

PPD department days

20-21st August, 2026 @Tallnäs

08/26/2026

Mullsjö 2024

1.

**Closer connection
between
research & education
...also researchers and educators**

2.

**Take care of our
employees – eachother**

Fika culture, greeting, seeing, hearing

3.

Taking responsibility for agreed work.

**Clarify expectations. Don't assume.
Give feedback about + & -**

Nässjö 2025

Tallnäs 2026

Agenda 20/8

- 12:00-13:00 Lunch
- 13:00-13:30 Introduction
- 13:30-14:30 PPD strategy
- 14:30-15:00 Fika
- 15:00-17:00 Joint activity
- 17:00-18:00 Own time
- 18:00 Dinner

Tallnäs 2026

Agenda 21/8

- 08:45-09:00 Recap
- 09:00-11:30 Communication
incl. fika & Feedback –
Ann Stigestad/Anette
- 11:30-12:00 Closing
- 12:00-13:00 Lunch

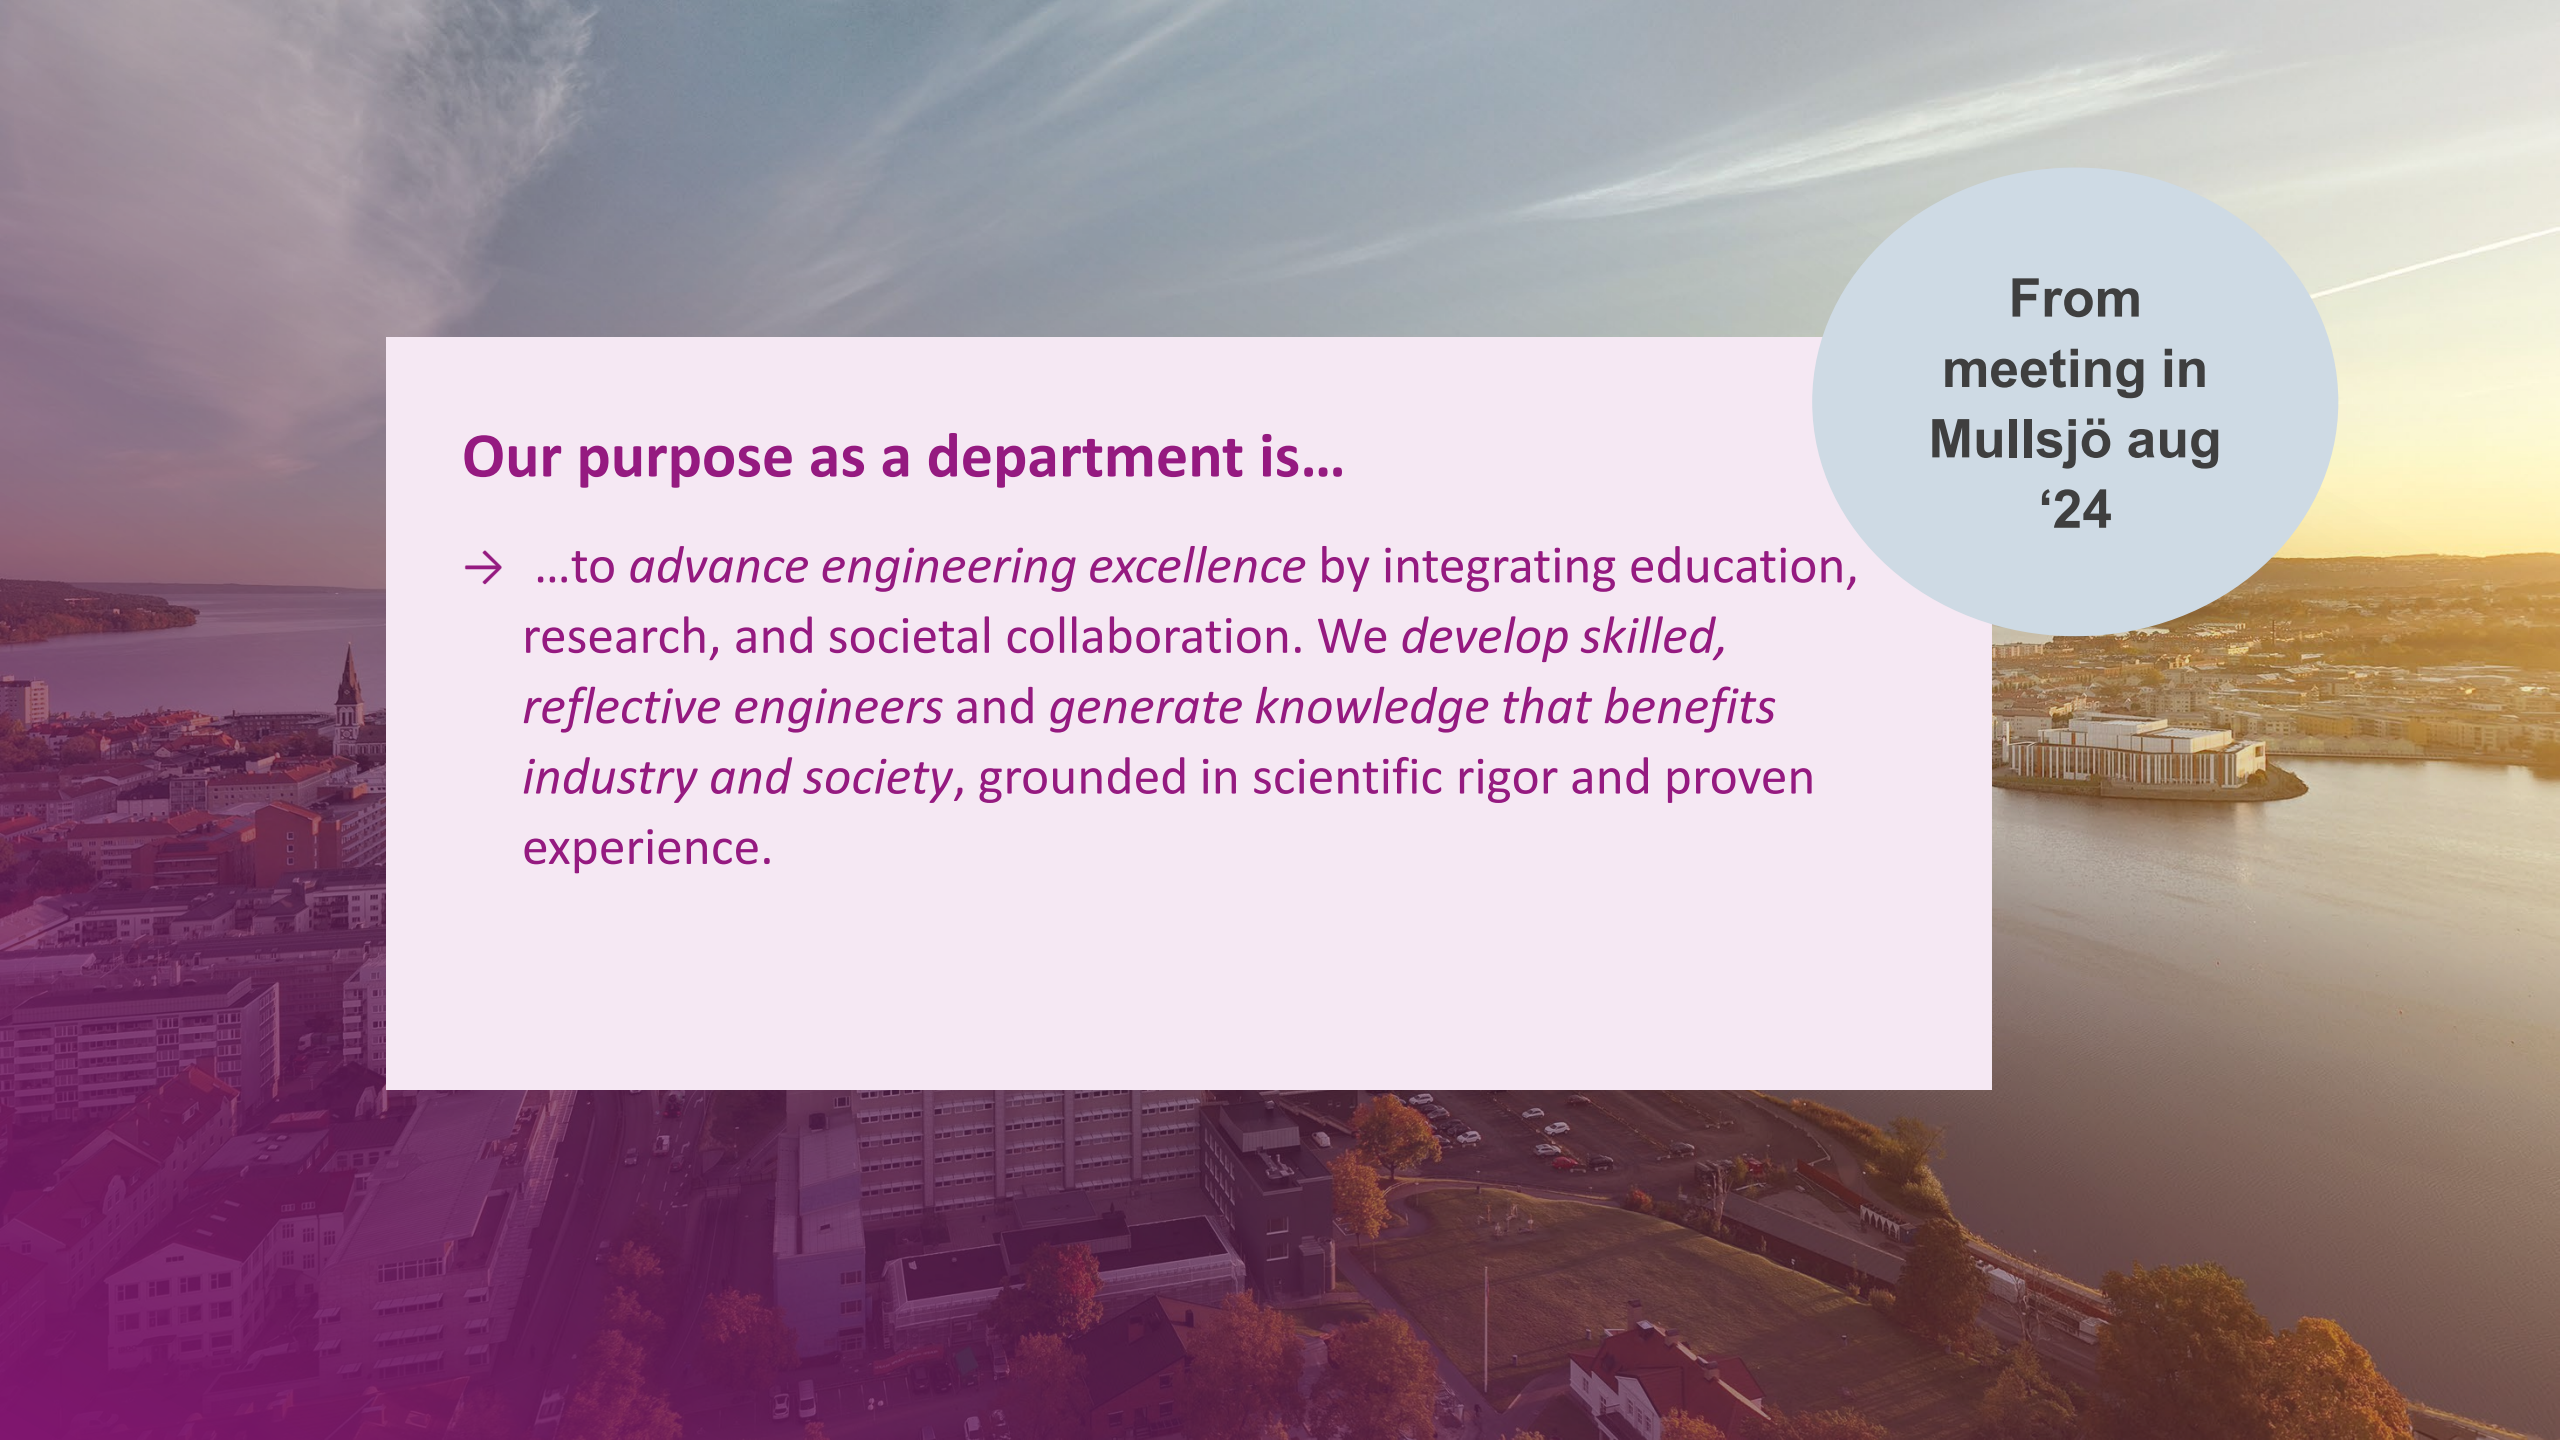

PPD – Strategy update

Priorities and activities

08/26/2026

Put purpose at the core of your strategy to stay relevant in a fast-changing world

Malnight, Buche and Dhanaraj, *Harvard Business Review*, 2019

Our purpose as a department is...

→ ...to *advance engineering excellence* by integrating education, research, and societal collaboration. We *develop skilled, reflective engineers* and *generate knowledge that benefits industry and society*, grounded in scientific rigor and proven experience.

From
meeting in
Mullsjö aug
'24

**Strategy as simple rules.
Guidance that helps
prioritize key processes,
make trade-offs, and
coordinate action.**

Kathleen Eisenhardt & Donald Sull, *Harvard Business Review*, 2001

PPD Work environment

JTH Goal #1a

A trust-building organization where people thrive

JTH Description

Current state: A good working environment with a positive JTH-spirit but still some challenges coming from a growing organization.

Objective: JTH is a trust-building organization with an inclusive and forward-looking culture that enables people to grow and thrive. The organization is clear and transparent regarding roles and decisions, and the support and administration are effective. The staff have a sustainable workload, and the physical premises, learning and study environments are state-of-the-art.

PPD Interpretation of the JTH goal

We are eachother's work environment and we have identified key development areas connecting to our organizational culture that we agree are still valid to work with.

PPD Goal / Milestones/Priorities

Goal/Milestone 1

Closer connection between research and education – and researchers and educators

Goal/Milestone 2

Take care of our employees – eachother

Goal/Milestone 3

Taking responsibility for agreed work.

Action plan 2026

- Follow-up activity on our culture – what behaviour do we allow /encourage – and what can we do to improve?
- staff activities to build stronger connection once per semester (social committee) aside of continuous meetings.
- improved planning process
- Workshop on communication and feedback processes

Measurement (KPIs, etc)

- Ambassadorship of employees (eNPS)* 9,4 (-100 to +100)
- Psychological safety* 7,4 (10)

PPD Work environment

JTH Goal #1a

A trust-building organization where people thrive

PPD Goal / Milestones/Priorities

Goal/Milestone 1

Closer connection between research and education – and researchers and educators

Goal/Milestone 2

Take care of our employees – each other

Goal/Milestone 3

Taking responsibility for agreed work.

Action plan 2026

- Follow-up activity on our culture – what behaviour do we allow /encourage – and what can we do to improve? **Fall 2026**
- staff activities to build stronger connection once per semester (social committee) aside of continuous meetings. **Ideas? Fall 2026**
- improved planning process ✓
- Workshop on communication and feedback processes ✓
- **Session on time management – NEW (7/9)**

JTH Goal #1b

We drive change for a sustainable future

Description

Current state: Sustainability is an important part of our research and education, but there are room for more. Our operation is environmentally certified + 20Y.

Objective: Through our education and research, where resilience and circularity are key frameworks, we make impact and drive change for a sustainable future. We take active responsibility for reducing our own climate impact and carbon footprint by promoting climate-conscious decisions at all levels.

PPD Interpretation of the JTH goal

We take active responsibility and align sustainability initiatives with our research and education to create meaningful win-win situations.

PPD Goal / Milestones/Priorities

We align with and contribute to JTH overarching goals and initiatives through our education and research.

We are creative, curious and resourceful in our everyday operations and integrate sustainability in both teaching and research where possible.

Action plan 2026

- Create a sustainability group that promotes sustainability initiatives
- Investigate how/if possible to pilot a "PPD repair workshop" including students and staff
- Have a seminar/workshop to showcase examples on how to apply sustainability in a concrete way in teaching
- Review, update and create awareness about the Sustainability dashboard.
- Share info about ongoing research seminars and other sustainability activities we take part in/contribute to

Measurement (KPIs, etc)

- At the end of the year – do we feel we did enough?

JTH Goal #1b

We drive change for a sustainable future

PPD Goal / Milestones/Priorities

We align with and contribute to JTH overarching goals and initiatives through our education and research.

We are creative, curious and resourceful in our everyday operations and integrate sustainability in both teaching and research where possible.

Action plan 2026

- Create a sustainability group that promotes sustainability initiatives **Fall 2026 (I will send you an invitation. Please accept it if you are interested in joining.)**
- Investigate how/if possible to pilot a "PPD repair workshop" including students and staff ?
- Have a seminar/workshop to showcase examples on how to apply sustainability in a concrete way in teaching **Fall 2026 (Pedagogy group, Educate and Miljöråd)**
- Review, update and create awareness about the Sustainability dashboard. **Fall 2026 Sustainability PPD dashboard (new idea?)**
- Share info about ongoing research seminars and other sustainability activities we take part in/contribute to **Fall 2026 PPD dashboard** [Sustainability dashboard - Jönköping University](#)
- **Personal Sustainability Goals (Sustainability Tip of the Month)**

JTH Goal #2

Attractive and relevant education with the learning experience in focus

Description

Current state: High competition for engineering students and rapidly changing technical fields. AI is having an increasing impact on the work of students and teachers.

Objective: JTH offers attractive and relevant education with close connection to work-life and international opportunities. The learning experience is in focus, meaning pedagogy at the forefront, modern learning environments, updated digital tools and efficient administrative processes. Students graduate with a strong theoretical foundation combined with practical skills well prepared for the challenges of working life.

PPD Interpretation of the JTH goal

To support the overall JTH goal, we focus on the quality and relevance of the learning experience. To remain "attractive and relevant" our education must be dynamic and deeply connected to the professional world.

We will actively embed practical problem-solving, modern technical tools, and direct industry perspectives into our programs. Our focus is on creating a supportive, first-class environment where students develop a strong theoretical foundation with immediate practical application.

PPD goals and milestones

Long term goal

We are the student's firsthand choice by offering cohesive programs from 1st to 3rd cycle that link relevant research with practical problem-solving in a first-class, supportive teaching environment.

Sub-goal 1 (2026 - 2028)

Our educations are relevant through our high overall technical focus and continuous development of the technical progression in all our programs.

Sub-goal 2 (2026 - 2028)

Our educations are attractive by integrating industrial perspectives via cases/projects in courses and by continuously acting on our program reviews.

Sub-goal 3 (2026 -)

Our staff has continuously updated, state-of-the-art competency, and we have a modern physical/digital environment (lab equipment, premises and software).

Action plan 2026

- **(SG1) Coordinate progression:** Introduce regular meetings (Teachers, KA, PA) to align and document program progression and technical content in courses.
- **(SG1) Raise the overall technical focus:** Implement more practical cases in courses, for example by utilizing mathematical modeling, simulations, and/or the JTH-labs environment.
- **(SG2) Integrate industry:** Increase the number of industry-inspired assignments and use industrial councils to continuously evaluate program relevancy.
- **(SG2) Increase marketing:** Initiate marketing efforts to attract more students, for example in collaboration with industry.
- **(SG3) Develop staff:** Create routines for continuous pedagogical and technical development of staff. (including AI)
- **(SG3) Develop the physical and digital environment:** Carry out annual inventory and update plans of the physical environment, lab equipment, and software (also considering potential external collaborations).

Measurement (KPIs)

- (LTG) First-choice applicants (JTH KPI). [#]
- (SG1) Programs documenting progression in detail [#]
- (SG1) Courses with modeling, simulations, JTH-labs usage [#]
- (SG2) Industry-anchored cases/projects per program. [#]
- (SG2) Marketing initiatives [#]
- (SG3) Teachers with pedagogical/technical development. [#]
- (SG3) Performed inventory and update plan [Y/N]

JTH Goal #2

Attractive and relevant education with the learning experience in focus

PPD goals and milestones

Long term goal

We are the student's firsthand choice by offering cohesive programs from 1st to 3rd cycle that link relevant research with practical problem-solving in a first-class, supportive teaching environment.

Sub-goal 1 (2026 - 2028)

Our educations are relevant through our high overall technical focus and continuous development of the technical progression in all our programs.

Sub-goal 2 (2026 - 2028)

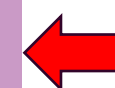

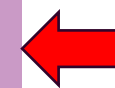

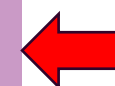

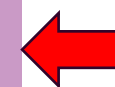

Our educations are attractive by integrating industrial perspectives via cases/projects in courses and by continuously acting on our program reviews.

Sub-goal 3 (2026 -)

Our staff has continuously updated, state-of-the-art competency, and we have a modern physical/digital environment (lab equipment, premises and software).

Action plan 2026

- **(SG1) Coordinate progression:** Introduce regular meetings (Teachers, KA, PA) to align and document program progression and technical content in courses.
- **(SG1) Raise the overall technical focus:** Implement more practical cases in courses, for example by utilizing mathematical modeling, simulations, and/or the JTH-labs environment.
- **(SG2) Integrate industry:** Increase the number of industry-inspired assignments and use industrial councils to continuously evaluate program relevancy.
- **(SG2) Increase marketing:** Initiate marketing efforts to attract more students, for example in collaboration with industry.
- **(SG3) Develop staff:** Create routines for continuous pedagogical and technical development of staff. (including AI)
- **(SG3) Develop the physical and digital environment:** Carry out annual inventory and update plans of the physical environment, lab equipment, and software (also considering potential external collaborations).

JTH Goal #3

Research excellence with high societal impact through Areas of Strength

Description

Current state: Successful growth in externally funded research during the last decade. Three Areas of Strength are defined. Some challenges are international funding and unclear organization.

Objective: Our cross-disciplinary Areas of strengths lead towards research excellence. This implies strong and diversified funding, high publication impact, an excellent research education and lab infrastructure.

PPD Interpretation of the JTH goal

The department contributes to the overall goal through cross-disciplinary collaboration, high-quality research outputs, diversified external funding, and impactful publications. It prioritizes international partnerships, balanced funding with emphasis on EU projects, and education at second- and third-cycle levels aligned with active research and industry needs. We aim to secure state-of-the-art research infrastructure and ensure a robust doctoral education integrated with ongoing research.

PPD Priorities and Goals

Journal publications ranked in WoS/Scopus

- Goal 2030: 1,5 year/FTE seniors

International collaboration

- Goal 2030: regular exchange of researchers and doctoral students with a group of international partners

Well-balanced external funding, especially EU funding

- Goal 2030: 80% external funding
- Goal 2030: partner in two EU-funded research projects

Education on third- and second-cycle aligned with research and relevant for students and industry

- Goal 2030: 12 active doctoral students
- Goal 2030: more than 50% of second-cycle credits are connected to active research and given by active researchers

Access to state-of-the-art research hardware and software

- Goal 2030: access to required hardware and software for research, internally or externally through collaboration

Action plan 2026

- Ensure funding/time for journal publications in projects with additional support of internal funding
- Develop a plan for internationalisation and initiate the work
- Develop our understanding about EU calls and requirements by participating in JU activities and individual activities on CrowdHelix
- Contribute to the development of the new third-cycle subject and to third-cycle courses nationally at JTH and nationally
- Ensure that a substantial part of our master's programmes is directly connected to our active research while also ensuring industrial relevance and attractiveness among prospective students
- Develop a department plan for Hardware/Software research infrastructure aligned with education needs

Measurement (KPIs)

Journal publications ranked in WoS/Scopus (no. year/FTE seniors)

International exchange (no. visits)

External funding (%)

Partner in EU-projects (no.)

Active doctoral students (no.)

Aligned courses second-cycle (%)

Access to HW/SW (perceived fulfilment)

Research excellence with high societal impact through Areas of Strength

PPD Priorities and Goals

Journal publications ranked in WoS/Scopus

- Goal 2030: 1,5 year/FTE seniors

International collaboration

- Goal 2030: regular exchange of researchers and doctoral students with a group of international partners

Well-balanced external funding, especially EU funding

- Goal 2030: 80% external funding
- Goal 2030: partner in two EU-funded research projects

Education on third- and second-cycle aligned with research and relevant for students and industry

- Goal 2030: 12 active doctoral students
- Goal 2030: more than 50% of second-cycle credits are connected to active research and given by active researchers

Access to state-of-the-art research hardware and software

- Goal 2030: access to required hardware and software for research, internally or externally through collaboration

Action plan 2026

- Ensure funding/time for journal publications in projects with additional support of internal funding **Ongoing, all researchers contribute**
- Develop a plan for internationalisation and initiate the work **Roland and Milad will establish a way of working**
- Develop our understanding about EU calls and requirements by participating in JU activities and individual activities on Crowdhelix **Ongoing, all researchers contribute**
- Contribute to the development of the new third-cycle subject and to third-cycle courses nationally at JTH and nationally **Ongoing, Fredrik E coordinates. All PPD PhD students have changed subject.**
- Ensure that a substantial part of our master's programmes is directly connected to our active research while also ensuring industrial relevance and attractiveness among prospective students Fall 2026, **Carin and Fredrik E will review and propose further activities. Recruitment ongoing.**
- Develop a department plan for Hardware/Software research infrastructure aligned with education needs **Roland, Milad and Johan will analyse the need and develop plan. SMEC.**

PPD Internationalization

JTH Goal #4

Strong international partnerships with a special focus on Europe

Description

Current state: Many international students and staff on campus. Exchange imbalance with too few outgoing students. Most international collaborations exclude staff mobility and research.

Objective: Strong international partnerships is defined as mutual benefit collaboration with a good match of research and educational programs, joint research projects, and student and staff mobility. A special focus on Europe to increase possibilities of funding.

PPD Interpretation of the JTH goal

Strong international partnerships can promote increased quality, research excellence, competitiveness and funding that benefits PPDs research and education in different ways.

PPD Goal / Milestones/Priorities

2030 or earlier:

- We have minimum one closer partner within the EU-list partnership (both in research and education)
- We continuously explore new partnerships and strive to learn from other schools in primarily Europe
- We offer bachelor courses in English for exchange students
- Our students are eager to study abroad and feel well supported in doing so

Action plan 2026

- Explore and promote sources of funding for staff exchange or similar
- Follow-up on STUBA relationship and define at least one joint activity
- Outlining a structure for how to work with potential exchange universities in Europe for each program.
- Identify a suitable semester/part of semester where courses in English could be provided at bachelor level (incoming & outgoing)
- Develop a summer course to offer 2027

Measurement (KPIs, etc)

- Student*/staff mobility**
- Number of international program students*
- International co-authorship**

*JU KPI, **JTH KPI

PPD Internationalization

JTH Goal #4

Strong international partnerships with a special focus on Europe

PPD Goal / Milestones/Priorities

2030 or earlier:

- We have minimum one closer partner within the EU-list partnership (both in research and education)
- We continuously explore new partnerships and strive to learn from other schools in primarily Europe
- We offer bachelor courses in English for exchange students
- Our students are eager to study abroad and feel well supported in doing so

Action plan 2026

- Explore and promote sources of funding for staff exchange or similar
- Follow-up on STUBA relationship and define at least one joint activity
- Outlining a structure for how to work with potential exchange universities in Europe for each program.
- Identify a suitable semester/part of semester where courses in English could be provided at bachelor level (incoming & outgoing)
- Develop a summer course to offer 2027

Collaboration

JTH Goal #5

Leading in collaboration between education and industry

Goal Description

We are the **leading technical university in Sweden within collaboration in education** – where academia and industry work hand in hand to develop the skills of tomorrow. Our aim is to integrate education with real-world challenges in a systematic and meaningful way.

Motivation

Collaboration with industry makes our programs relevant and attractive, increasing employability for students and attracting top talent to JTH. A more systematic approach will ensure that students experience collaboration as a continuous part of their whole education.

Action plan 2026

- Create an implementation plan and start implementation for each program:
 - 2 industry council meetings per year
 - 1 company visit per year
 - 2 industry guest lectures per semester
 - 2 company cases/projects per year (from year 2)
 - 1 company-related project course per program (at least 7,5 credits)
- The Collaboration Council develops entries in the External Relation Portal that measure what does not exist today.
- Conduct a competitive analysis
- Develop a collaboration index in education.

Measurement

- Collaboration index in education

* = JU KPI

Year of fulfillment

2028

PPD Internationalization

JTH Goal #1a

Leading in collaboration between education and business life

PPD Goal / Milestones/Priorities

Goal - 2030 or earlier

Continuous, structured and meaningful input from business life to our educations that mirrors the goals at JTH level:

For each program:

2 industry council meetings per year

1 company visit per year

2 industry guest lectures per semester

2 company cases/projects per year
(from year 2)

1 company-related project course per program (at least 7,5 credits)

Action plan 2026

- Revitalize our list of course activities in Teams and remind course responsables to fill it in before each study period.
- Decide on industry council set up/format, invite selected members to first meetings
- Integrate the goals into the QR/QIP process

Our strategy process at PPD (& JTH)

- Moving forward – we make our strategies visible and present in our every day work. Recognizing achievements & challenges in our joint meetings.

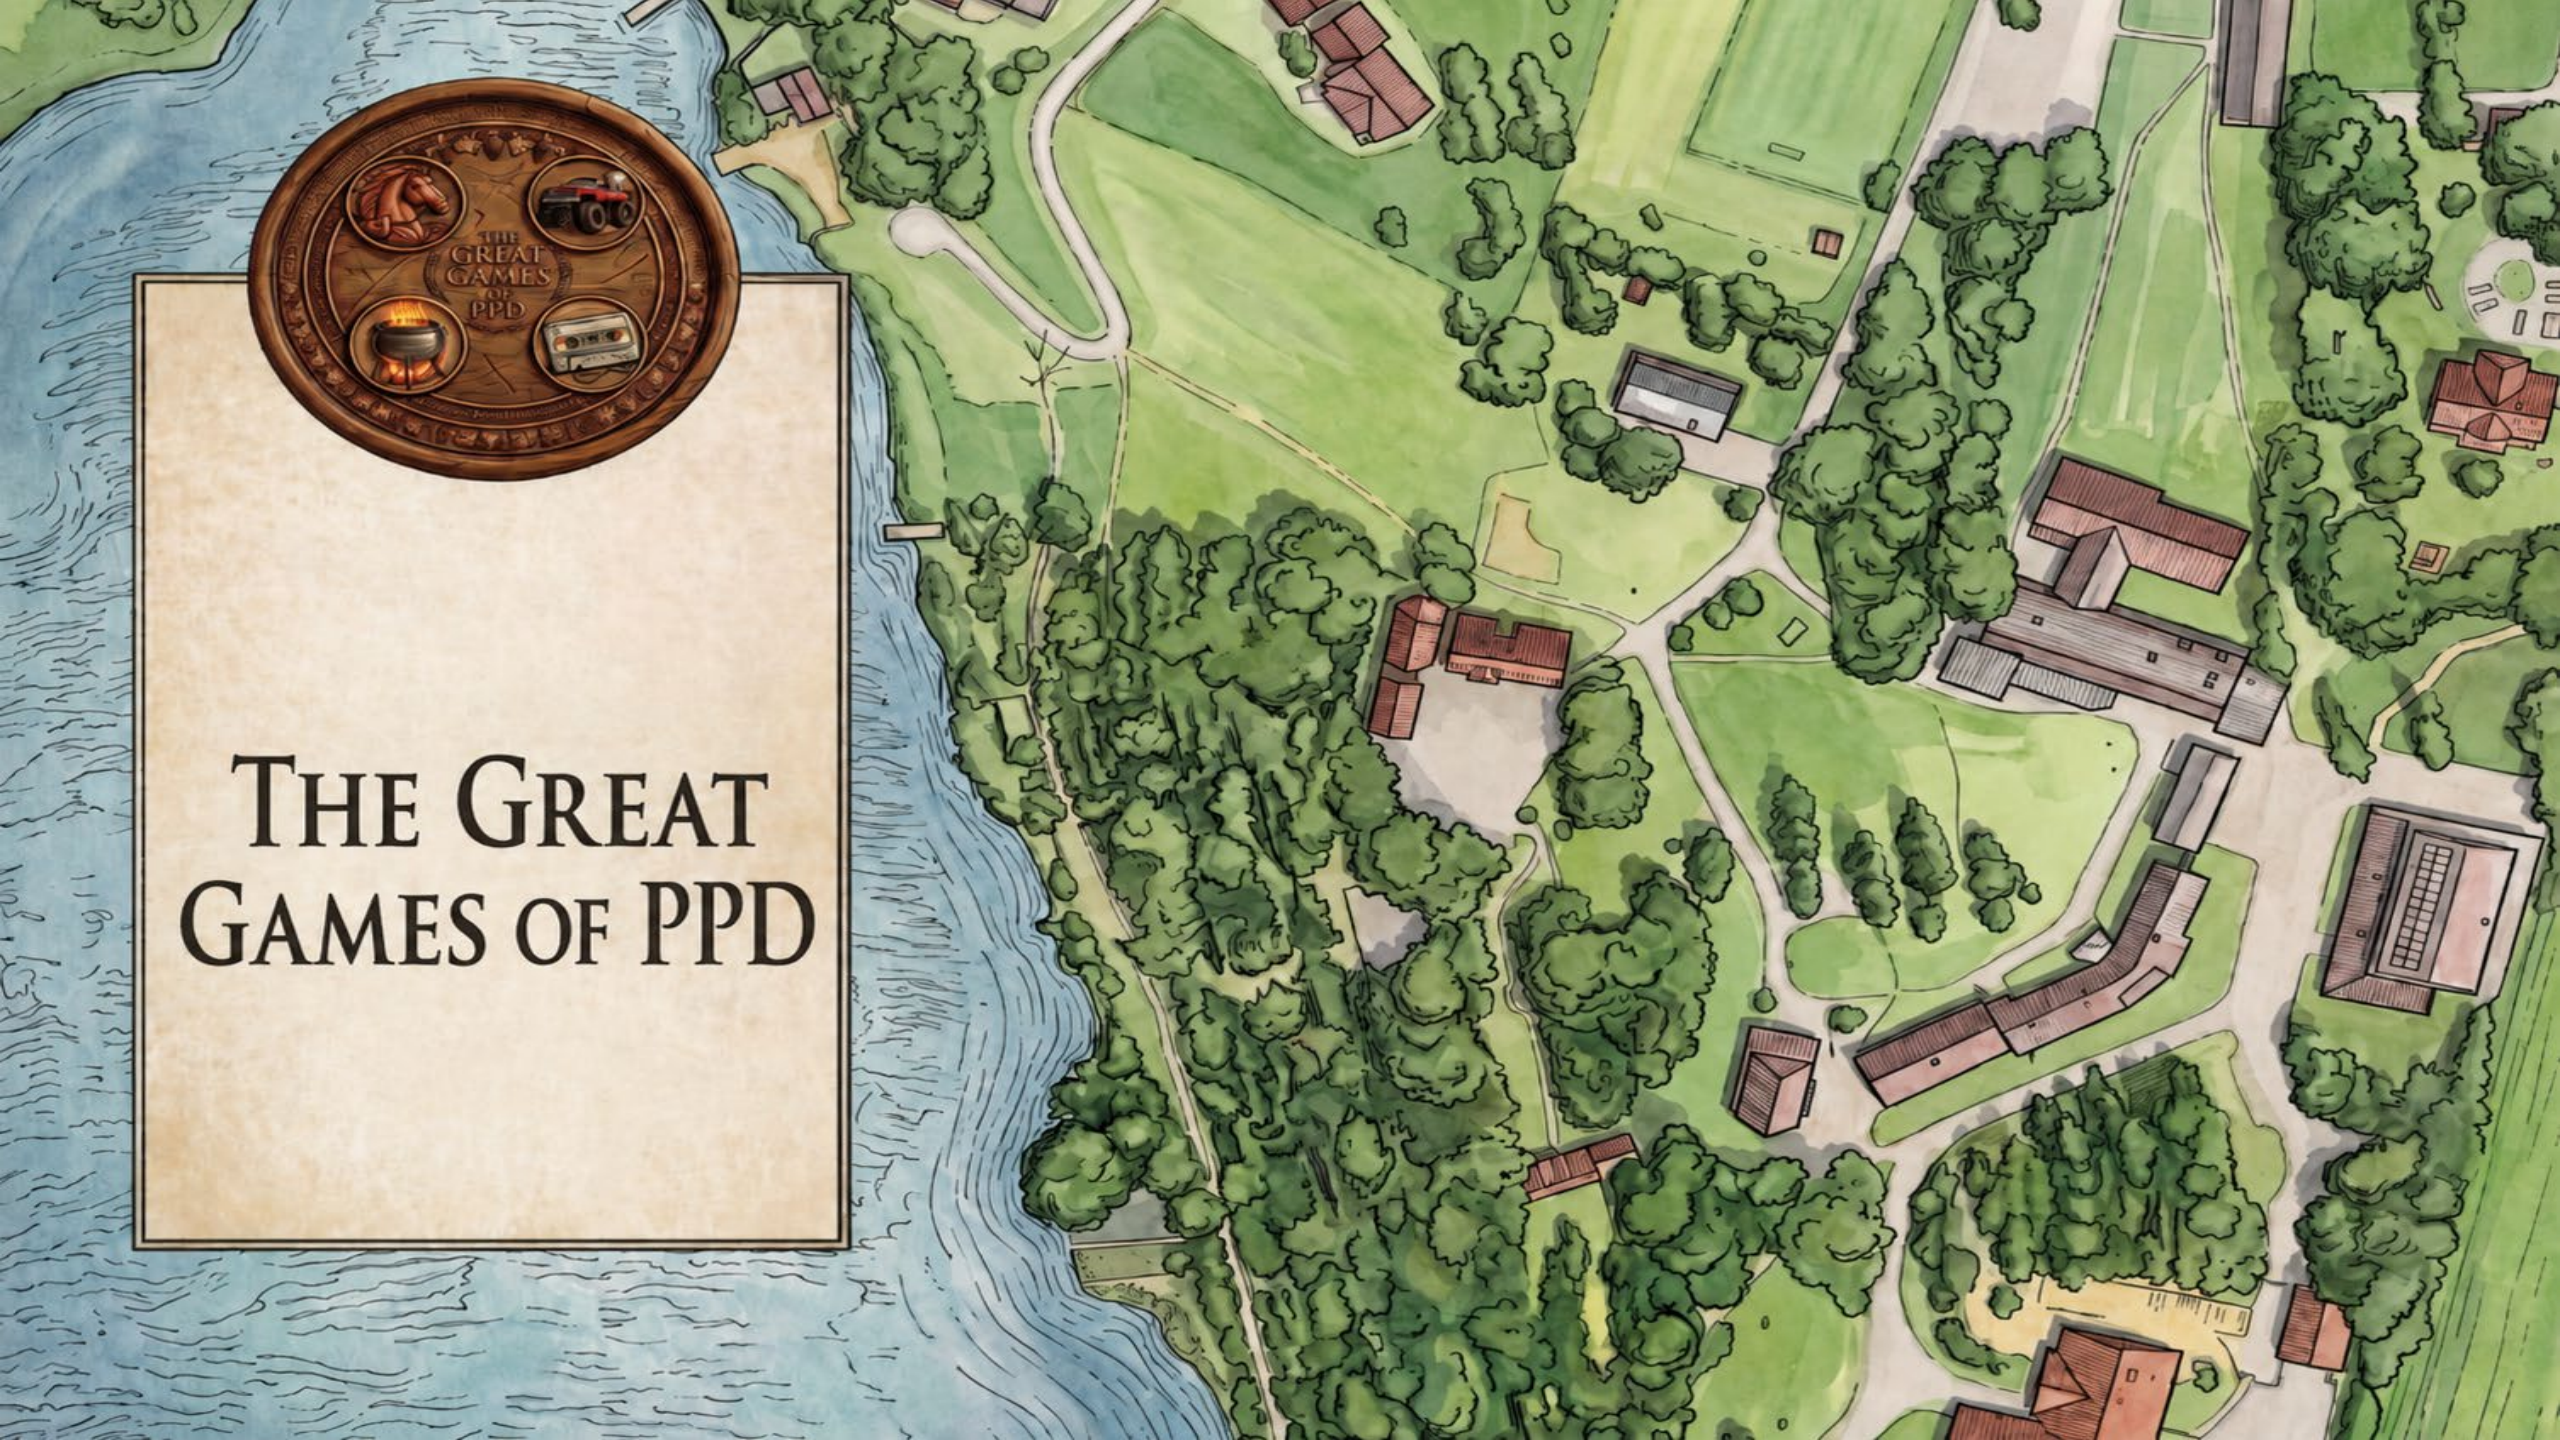

Tallnäs 2026

Agenda 20/8

- 12:00-13:00 Lunch
- 13:00-13:30 Introduction
- 13:30-14:30 PPD strategy
- 14:30-15:00 Fika
- 15:00-17:00 Joint activity
- 17:00-18:00 Own time
- 18:00 Dinner
